Course Description

Effective management is closely linked to the interaction of many people, which combines the planning and coordination of their joint activities, including conflict management. Managers face the challenges of influencing individuals, teams, organizational systems. As technology evolves, managers need to combine their forces to achieve common goals. Today new leaders (not managers) coordinate teamwork. Some management theorists argue that personnel management will give way to modern discipline, team management. The purpose of studying the discipline "Team Management and Leadership" is to develop students' theoretical knowledge and practical skills to use modern methodologies and tools for the effective team formation and management.

The knowledge and skills acquired in the study of discipline can be implemented in management and executive activity in any sphere of national economy.
