### Description of the discipline

The study of the discipline ensures that students acquire knowledge about the formation of a holistic worldview. The latter includes knowledge about the directions of development of civilization, ways of harmonizing ecological, economic and social aspects of human activity in the conditions of globalization. In the process of training, applicants will become familiar with the features and strategic orientations of the transition of EU countries and Ukraine to the path of sustainable development (change in the model of nature use; transition to an intensive type of production based on the use of the latest environmentally safe technologies; formation of a new demographic policy aimed at population reproduction) and expanded opportunities of international cooperation in the field of sustainable development in the conditions of global challenges and threats .
